Discharge Toxicity Evaluation

1. Except as provided below, all applicants for permits to discharge to a surface waterbody (i.e., for new and existing discharges) must perform a Discharge Toxicity Evaluation (DTE) in accordance with RCSA section 22a-430-4(c)(21)(B) and submit the results of the DTE as Attachment O, Table 6.

2. Exceptions: A DTE need not be performed or submitted with this application if:
   a. this application for a permit is to discharge sewage from a POTW; or
   b. a DTE covering all discharges to surface waters at the site has been previously approved by DEEP; or
   c. the applicant has been specifically exempted from submission of a DTE for the discharge(s), in writing by DEEP, in accordance with RCSA section 22a-430-4(c)(21)(C), prior to submittal of this application (see instructions).

3. For discharges to a POTW, a DTE may be required depending on the nature of the discharge. In this case, you will be notified by DEEP after submitting your application.
