

SUMMER 2008 CT DEP MUNICIPAL SOLID WASTE MANAGEMENT FULL COST ACCOUNTING SURVEY
REPORT 2 Section 1 – Curbside Pickup of MSW For Disposal

Report 2 Section 1 presents individual municipal responses to the following Survey questions related to curbside pick-up of trash and is divided into two parts: residential and commercial.

To search responses by individual towns/cities, type the town/city’s name into the search box at the top of the PDF.

Part 1 – Residential Curbside Pick-up of MSW for Disposal

Table 1 Combines Information from Various Survey Questions Regarding the infrastructure for Residential Curbside Pickup of MSW for Disposal:

Municipality	Population	Question 15 – Options for Curbside Pickup of Residential MSW for Disposal	Question 16 - Multifamily pickup provided by Municipality	Question 18 - Automation of Curbside Pickup	Question 19 – Size of Automated Trash Containers	Question 20 Is Municipality Considering Switch to Automated or Semi-Automated?	Question 21– Comments regarding switching to automated from manual
--------------	------------	---	---	---	--	--	--

Table 2 Combines Information from Various Survey Questions Regarding Municipal Costs Involved with Residential Curbside Pickup of MSW for Disposal:

Costs Related to Curbside Pickup of Residential Trash					
Municipality	Population	Question 45 – Total Annual Municipal Expenditures for Curbside Collection of Residential Trash etc	Question 46 – The Per Household Monthly Fee Paid to Contracted Hauler for Residential Trash Pick-up	Question 17 – Is Recycling Pickup Included in Per Household Monthly Fee Paid to Contracted Hauler for Residential Trash Pick-up	Question 49 – Total Annual Expenditures for Residential Curbside Pickup of <i>Oversized</i> MSW

Question 15 - Curbside residential MSW disposal pick-up in your municipality is provided by:

- Homeowners self-haul MSW for disposal to transfer station or disposal facility
- Municipal employees provide curbside pick-up of residential MSW for disposal
- Private haulers contracted by the municipality provided curbside pick-up of residential MSW for disposal
- Private haulers contracted by homeowner provide curbside pick-up of residential MSW for disposal
- Other

Question 16 – If the municipality or a municipal contractor provides curbside pickup of MSW for disposal, up to what size multi-family building does it pick up from?

Question 17 –If residential MSW for disposal –i.e. does the cost per household also include curbside pickup of recyclables?

Question 18 –Please describe how residential MSW for disposal is picked-up curbside in your town:

- Choices: Automated; Semi-automated; Manual; Combination

Question 19 – If your residential MSW trash disposal curbside pick-up is automated or semi-automated, please indicate the size(s) of the containers used:

- Choices: 90 gallon or larger; 64 gallon; 32 gallon

Question 20 – If your municipality currently picks up residential MSW for disposal manually, is your municipality contemplating a switch to automated or semi-automated pick-up?

- Choices: Yes; No; Don't Know; N/A

Question 21 – If your town currently does not utilize automated curbside pick-up, please comment on why your town would or would not consider switching to automated pick-up.

Question 45 – If your town provides or contracts out for curbside pick-up of MSW for disposal please enter annual expenditures for curbside MSW (for disposal) collection. If your municipality does not provide or contract out for curbside MSW (for Disposal) collection, enter "0" in the total box

- Annual expenditures for curbside pickup of residential MSW (included in this report)
- Breakdown of expenditures is presented In Report 5 – Section 1

Question 46 –If your municipality pays for at least one component of curbside residential MSW disposal, please enter the dollar amounts accordingly below (please leave blank if not applicable)

- Amount municipality pays contracted hauler for residential MSW disposal pick-up per household per month (included in this Report)
- Amount municipality pays for MSW disposal tipping fee per ton (Included in Report 5 – Section 1)

Question 49 - If your municipality provides or contracts out for curbside collection of oversized MSW (furniture, mattresses, ect.) please enter annual expenditures for the curbside collection of oversized MSW. If your municipality does not provide or contract out for curbside collection of oversized MSW, enter:0: in the total box

- Total annual expenditures for curbside collection of oversized MSW (included in this Report)
- Breakdown of expenditures is presented In Report 5 – Section 1

Part 2 – Non-Residential Pick-up of MSW for Disposal

Table 3 Combines Information from Various Survey Questions Regarding the infrastructure for Pickup of MSW for Disposal from Commercial Entities:

Infrastructure for Curbside Pickup of Commercial Trash for Disposal				
Municipality	Population	Question 22 – Options for Curbside Pickup of Commercial MSW for Disposal	Question 23 - Type of Commercial Entities for which Municipality Provides etc.	Question 24 - Type of Commercial Entities for which Municipality Pays the Disposal Tipping Fees

Question 22 –Pick-up of commercial MSW for disposal is provided by (check all that apply):

- Municipal employees pick-up MSW for disposal from at least some commercial entities
- Private hauler contracted by municipality picks up MSW for disposal from at least some commercial entities
- Private hauler contracted by individual commercial entities, institution, etc. pick-up MSW for disposal
- At least some commercial entities have option to self-haul their MSW for disposal to town transfer station
- Other

Question 23 – *If your municipality provides or contracts for MSW disposal collection from commercial entities, please indicate the type of commercial entities (e.g. small businesses, schools, non-profits, etc.) If municipality doesn't provide or contract such pick-up enter :none"*

Question 24 – *If your municipality pays MSW disposal tipping fees for any commercial entities (e.g. small businesses, non-profits, etc.) please indicate the type of entities. If municipality does not pay any commercial disposal tipping fees enter "none"*

To obtain more detailed municipal transfer station expenditure information from the survey please contact Judy Belaval at (860) 424-3237 or judy.belaval@ct.gov for details.

Infrastructure for Curbside Pickup of Residential Trash for Disposal

Municipality	Population	Question 21 – Comments regarding switching to automated from manual
Ansonia	18,550	Ease of pickup and aesthetics
Berlin	20,254	Costs for Containers needs to be offset by savings in hauling and disposal tonnage.
Bolton	5,116	Initial cost of containers
Bridgeport	136,695	High population density and excessive on street parking prohibits full automated system. City is in process of implementing a full City wide semi-automated program over the next year. currently at about 25 percent. City is also looking at the PAYT/SMART program for possible implementation.
Brooklyn	7,886	Small Town, this would be too costly in our budget.
Burlington	9,143	The Town has just begun looking into automated curbside pick-up.
Canterbury	5,100	The Town does not currently utilize curbside pick-up.
Cheshire	28,833	The last time the Town bid for these services was four years ago, we included an alternate for automated collection. The prices were favorable, but after some public input we realize that our residents take this matter very seriously decided that our residents were not ready for this change at that time. We did not want to force change upon them when they were happy with the status quo.
Cornwall	1,480	System functions to our satisfaction as it now stands.
Danbury	79,226	The City of Danbury contracts with AWD to run a "Mom & Pop" solid waste and recycling program for Danbury Residents. We do not provide curbside pick-up. Curbside is done by haulers contracted individually by the homeowner.
Derby	12,434	This has to be determined by the Board of Aldermen and determine if it would be cost effective.
East Windsor	10,617	Funds are always questionable
Enfield	45,011	In process of transitioning over to Automated
Fairfield	57,548	Private haulers provide the service. Each and every one would have to purchase all new equipment and pass the cost on to the homeowner. The system works well as is.
Groton	42,324	initial cost of change over to automatic

[Recycling Contacts](#)

Infrastructure for Curbside Pickup of Residential Trash for Disposal

Municipality	Population	Question 21 – Comments regarding switching to automated from manual
Hamden	57,698	The Town goes out to bid and accepts the lowest bid for contract. The current hauler does not have the ability to conduct automated pickup. The cost to transition over would be the issue, if the Town would have to buy trash and recycling containers for each resident. Also, logistics of pickup, cars parked on the road etc. would create issues.
Hampton	2,118	cost
Harwinton	5,564	Our town permits with 5 haulers. Switching to automated curbside pickup would mean contracting with one hauler or dictating change to the 5 haulers. There is no good reason to change.
Ledyard	15,097	There is an awareness of the potential for automated pick-up, but also an awareness of related logistical and cost issues that are present hurdles.
Litchfield	8,671	The town does not use automated services now but may in the future if the cost was low enough to save money for residents.
Mansfield	24,884	Automated systems to not allow for small quantity trash generators. Some residents only produce a 13 gallon bag of trash a week. Others a 30 gallon bag per week. The cans for automation are much larger than that.
Marlborough	6,351	NO TOWN INVOLVED CURBSIDE PICK UP. RESIDENTS BRING TO TRANSFER STATION THEMSELVES OR CONTRACT DIRECTLY WITH A SUBCONTRACTOR.
Meriden	59,225	Cost would need to be considered before commencing automated pickup. The purchase of new trash cans by the haulers would be passed on to the customers. Impending large increases are on the horizon at the end of the current contract. These factors need to be considered before jumping on this program.
Middlebury	7,252	We currently operate a transfer station at a lower cost than curbside pickup
Middletown	47,778	We only have one small private hauler left in town who collects manually.
Milford	55,445	cost

Infrastructure for Curbside Pickup of Residential Trash for Disposal

Municipality	Population	Question 21 – Comments regarding switching to automated from manual
Naugatuck	31,931	Naugatuck expects to purchase new vehicles within the next two years and has formed a Sanitation Committee to determine the best options. Currently municipal union employees collect residential curbside MSW manually, any changes would have to be negotiated with the union. Initial capital cost of automating the majority of the routes is a major deterrent in changing the system. Two additional concerns are the high maintenance of an automated vehicle and the lack of garage space to house the vehicles. We are also concerned with residents ability to "hide" any manner of materials in the carts including HHW and recyclables. We expect Naugatuck residents to protest if required to use automated barrels due to the volume limit and their current perception of being allowed to throw out as much trash each week as they want. The advantages of the automated system include reduction of worker's compensation claims and reducing the manpower on the route from three to one employee per truck.
New Hartford	6,736	cost of providing this service is a factor
New Haven	123,932	Generally, most of the inner urban areas have low overhead wires and low lying tree branches and automated pick-up has been viewed as being potentially challenging.
North Branford	14,406	Has been discussed in past with previous hauler but expensive for them to do. Have not discussed with current
North Canaan	3,352	Have transfer station Works well
North Haven	24,002	The cost.
Norwalk	83,456	Configuration of streets and preponderance of on-street parking prevents it.
Norwich	36,432	We do not use the automated curbside pick-up, because we have many hills and densely populated areas making it difficult for automated pick-up.
Old Saybrook	10,539	Budget
Putnam	9,292	Initial start up capital costs of introducing equipment.
Roxbury	2,319	municipality does not provide for curbside pick-up, private hauler is contracted by homeowner or homeowner may bring it themselves to transfer station by permit.
Sprague	2,981	Town roads are not wide enough, many are one way roads
Stafford	11,786	Width of streets prohibits this

[Recycling Contacts](#)

Infrastructure for Curbside Pickup of Residential Trash for Disposal

Municipality	Population	Question 21 – Comments regarding switching to automated from manual
Stratford	49,015	Initial start up cost
Thomaston	7,818	We did consider it when we went out to bid. The winning bidder does not provide automatic, otherwise we would have gone that route.
Union	751	Cost
Vernon	29,620	We feel automated collection would work well in some areas of town but not as well in others. Financially, we
Warren	1,384	The topography of the land would make it difficult for homeowners to place their containers in order to make it feasible for automated pick up.
West Haven	52,676	Cost of totter's and equipment to expensive to consider right now.
Westbrook	6,618	Because of cost of converting to town p/up of msw
Willington	6,139	cost
Wolcott	16,407	It is based on who is awarded the bid.
Woodbury	9,654	Cost - lack of personnel
