

Department of Developmental Services

Recovery Act Synopsis

October 2009 ARRA Report

As of the end of the first quarter of Fiscal Year 2010 DDS has not expended any of the \$4,559,747 ARRA funding that has been awarded. The Department anticipates expenditures will begin to be made during the second quarter of FY 2010. All funding will be used for early intervention services provided by private agencies under contract with the Department. These agencies will bill the Department monthly for services rendered. By the end of fiscal year 2010, the Department anticipates spending the entire \$4,559,747. In future ARRA reports, the Department will identify all sub recipients who actually received ARRA funding from DDS.

The reporting to the Federal website for the first quarter of Fiscal Year 2010 was completed on October 9, 2010, meeting the 1010/09 deadline. Some corrections to the report were required because categories reported as "0" or "None" also required subcategories to be reported as "0" or "None" rather than leaving them blank. The corrections were made and the file uploaded again the week of October 12th.
